4. Law. An instrument in writing (which for this purpose includes printing or other legible representation of words on parchment or paper), purporting to effect some legal disposition, and sealed and delivered by the disposing party or parties.

Signature to a deed is not generally required by English law, but is practically universal; and in most jurisdictions outside England where English law or legal forms prevail, signature has been substituted for or made equivalent to sealing. Delivery (1,w.) is naw a moribund formality. Contracts of most kinds, as well as dispositions of property inter vivos, may be made by deed, and in common practice are often so made.

The conception and the phrase (causa deficient) appear first in St. Augustine, in his discussion of the origin of evil and of God's relation to it, and are connected with his doctrine that evil being nothing positive, but merely a defect, could have no efficient, but only a deficient cause. It was also used by Thomas Aquinas (who distinguished the physical sense of the phrase from the moral); in English it came into vogue during the Calvinistic-Arminian controversy in 16-17th c., in reference both to the origin of evil and to the reprobation of the wicked. The word has all the appearance of being of F. origin, but no equivalent OF. defier has yet been recorded, nor is it clear what the etymology of such a form would be. Phonologically, it might answer to L. difactive, diffective (see Defective); but the sense offers difficulties. It has been suggested, however, that if 1 b were the starting-point, it might conceivably answer to a late L. difactive atomachum (cf. disabtever stomachum Pliny). But the sense-development remains uncertain, and the order here followed is provisional. It may be that 'dissolve' was the primary sense.]

The word had undergone considerable development of meaning already in ancient Latin; in Romanic it received further extension in the line of meaning 'dainty, tenderly fine, slender, slight, easily affected or butt'; these Latin and Romanic senses have at various times been adopted in English, often as literal adaptations of the Latin word in the Vulgate, etc.; and the history of the word here is involved and difficult to trace. Cange)

The transition from the Latin seuse 'give in charge, entrust, commit, commend' to the Romanic sense 'request, ask', was probably made through the notion of entrusting or committing to any one a duty to be performed, of charging a servant, or officer, with the performance of something, whence of requiring its performance of him, or authoritatively requesting him to do it. Hence the notion of asking in a way that commands obedience or compliance, which the word retains in English, and of simple asking, as in French. An indirect personal object (repr. the L. dative) would thus be a necessary part of the original construction, but it had ceased to be so before the word was adopted in England, where the earliest use, both in Anglo-Fr. and English, is to demand a thing simply. The verb probably passed into the vernacular from its legal use in Anglo-French.]

Demesne is thus a differentiated spelling of the word Domain, q.v. T. Possession.

I. l'ossession. 1. Possession. (In Germanic, including English, law, the primary idea in relation to property is possession, not ownership (= Roman dominium), as we now understand it. Hence, derivatives of L. dominium and proprietus became in medieval law chiefly or even exclusively associated with possession. (Sir F. Pollock.)
1. Law. Possession (of real estate) as one's own.

Chiefly in the phrase to hold in demesne (tenere in dominico), i.e. in one's own hands as possessor by free tenure. (Formerly sometimes in pl. by con-

dominica), i.e. in one's own hands as possessor by free tenure. (Formerly sometimes in fl. by confusion with senses in II.)

Applied either to the absolute ownership of the king, or to the tenure of the person who held land to his own use, mediately or immediately from the king. Opposed to 'to hold in service' itenze in servicio; if A held lands, immediately or mediately of the king, part of which he retained in his own hands, and part of which were in turn held of him by B, he was said to hold the former 'in demesne', and the latter 'in service'. B, in his turn, might hold his portion wholly 'in demesne', or partly also 'in service' by admitting a tenant under him. In every case, the ultimate (free) holder, 'the person who stands at the bottom of the scale, who seems most like an owner of the land, and who has a general right of doing what he pleases with it, is said to hold the land in demesne'. Prof. F. W. Maitland.

'Dame Jane'); so Sp. dama-juana (as if Dama Juana); mod.Pr., in different dialects, dama-jana, damajano, damojano, damejano, dabajano, debajano; Cat. damajana; It. damigiana; mod. damigiana; mod. Arabic cheek. damajānah, dāmajānah, cheek. ct. in 19th c. lexicons.

The current Eng. form is the result of popular perversion as in 'sparrow-grass'; the earlier demijan, demijean, approach more closely to the F. and Romanic, whence the word was adopted. The original nationality and etymology of the word are disputed; see Rev. A. L. Mayhewin Academy 14 Oct. 1893. Some have assumed the Arabic to be the source of the Romanic forms, and have sought to explain this as of Persian origin, and derived from the name of the town Damghān or Damaghān, or Lot, and the town protum S.E. of the Caspian. But this is not supported by any historical evidence; moreover, the word does not occur in Persian dictionaries, nor in Arabic lexicons before the 19th c., and the unfixedness of its form (dāmijānat, dāmajānat, damanjānat), damanjānat, damanjānat, damanjānat, damanjānat, damanjānat, damanjānat, damanjānat, amandamat, and and the unfixedness of its form (dāmijānat, dāmajānat, damanjānat) points, in the opinion of Arabic scholars, to its recent adoption from some foreign language, probably from Levantine use of lt. damigiana. Assuming the word to be Romanic, some have taken the Provencal and Catalan forms as the starting-point, and conjectured for these either a L. type \*dimidiāna from dimidiam half (Alart in Rev. Lang. Rom. Jan. 1877), or the phrase dē madiāna of middle or mean (size) (in illustration of which Darmesteter cites from a 13th c. tariff of Narbonne the phrase 'ampolas de mieja megeira' = L. ampullās dē mediā mensūrā). But these suggestions full to explain the initial da-prevalent in all the langs.; on account of which M. Paul Meyer (like Littre) thinks that all the Romanic forms are simply adaptations or transliterations of the French, this being simply Dame Jeanne 'Dame Jane', as a popular appellation (cf. Bellarnine, greybeard, etc.). This is also most in accordance with the historical evidence at present known, since the word occurs in French in the 17th c., while no trace of it equally early has

An ordinary size is 5 gallons. Demijohns of clear glass, of ovate-quadrilateral section in the body (14×16 inches diam.), are employed to export vinegar and spirits to the West Indies, and are in common household use in the islands. The name is sometimes also given to vessels of earthenware or stoneware similarly cased.

γοργω Gorgon; but of uncertain origin: see below.]

Name of a mysterious and terrible infernal deity.

First mentioned (so far as known) by the Scholiast (Lactantius or Lutatius Placidus, γε 450) on Statius Theb. 11. 516, as the name of the great nether deity invoked in magic rites. Mentioned also by a scholiast on Lucan Pharsalia v. 1742. Described in the Repertorium of Conrad de Mure (1273) as the primordial God of ancient mythology; so in the Genealogia Deorum of Boccaccio. The latter appears to be the source of the word in modern literature (Ariosto, Spenser, Milton, Shelley, etc.).

[By some supposed to be a corruption of δημιουργός Deminingus; but this is very doubtful. The mediæval writers connect it with dæmon (Demon), and explain it as meaning either dæmonibus terror (terror to demons), or terribilis dæmon (terrible demon). From its connexion with magic, it may be a disguised form of some Oriental name.]

Dene-hole, Dane-hole (dēn-, dēin, hōul).

Also 9 Danes' hole. [app. from the national name Dane, Danes, ME. Dene, OE. Dene + Hole.

There is no doubt that this is popularly and traditionally the local interpretation of the name: see the first quot. In various parts of the country, e.g. the country of Dunham, other ancient caves and excavations are attributed to the Danes, and called Danes' holes or Dane-holes. It is not quite certain that dene-hole is a genuine popular form any-

where; but if so, it may possibly represent a ME. Denchol(e:—OE. Dena-hol, Danes' hole (cf. OE. Dena-lagu, ME. Denc-lawe, mod. Danes' law, Danc-law), or it may be merely a local pronunciation. But it has suggested to recent writers connexion with DENE sb.!, or with other of the sbs. so spelt, or with DEN (which is phonetically impossible); and either on this account, or because it does not countenance any theory about the Danes, it has been generally adopted by the archaeologists who have investigated these holes since c 1880. Some have very reprehensibly shortened the name dene-hole into dene, conformably to their erroneous conjectures as to its connexion with dene and den. The name numbled to a class of ancient excava-

In this form it was subsequently adopted in the United States, and eventually in general English use.

b. spec. One of the separate divisions or branches of state or municipal administration.

In the U.S. the word is used in the titles of the great hanches of administration, of which there are eight, the Departments (Peptis.) of State (orig. Foreign Affairs), War, Treasury, Navy, Post-office, Justice, Interior, and Agriculture. The Dept. of Labour is subordinate to that of the Interior.

In Great Britain, the great departments of State are not so named titularly, but the word is used in naming subdivisions or branches of these, e. g. the Factory Dept., and Prisons Dept. of the Home Office, and for certain other branches of administration as the Paymaster General's Dept., Science and Art Dept., Exchaquer and Anuil Dept., etc.; also in the Gas, Water. Electric Lighting, Tramways, and other Departments of a municipal Corporation.

Deponent (dipōu·něnt), a. and sb. [ad. L. dēponent-em, pr. pple. of deponère (see prec.), specused by the late L. grammarians as in sense 1.]

A. adj. Gram. Of verbs: Passive or middle in

form but active in meaning: originally a term of Latin Grammar.

Latin Grammar.

Both form and meaning were originally reflexive (e.g., utor 1 serve myself, frnor 1 delight myself, proficiscor I put myself forward, etc.), as in the Middle Voice in Greek; as, however, in ordinary verbs the reflexive form had become a passive in Latin, these verbs were erroneously regarded as having laid aside or dropped a passive meaning, whence the name. In reality, what was laid aside, or lost sight of, was the reflexive sense.

1328 Tindale Obed. Chr. Man (1573) 130 [He] maketh a verbe passive of a verbe deponent. 1669 Milton Accedence Wks. (1847) 4671 Of verbs deponent come participles both of the active and passive form. 1859 Donalnson Grk. Gram. 8, 433 A deponent verb is one which though exclusively passive or middle in its inflexions, has so entirely deponed or laid aside its original meaning, that it is used in all respects like a transitive or neuter verb of the active form. 1871 Goodwin Grk. Gram. (1882) 80 Deponent verbs are those which have no active voice, but are used in the middle or passive forms with an active sense.

As in the case of other words from modern French, the pronunciation varies widely. The French depo, with short e and o and undefined stress, is foreign to English habits of utterance. The earlier English rendering, as shown by the dictionaries down to 1860-70, was, according to the French historical stress and quantity, or the English conception of it (cf. bureau, thataun, Tussand), dipon, or, with a conscious effort to reproduce the first vowel in French, deponitions estimated by the stress is now more usually on the first syllable, and the quantity of the odoubtful, giving depo, dipo, in England, dipo, dipo, dipo, there the word is much more in popular use, and dipot, dipot, are mentioned by Longfellow, Lowell, etc., as popular vingarisms). The form depo comes as near the French depo as English analogies admit.
